

Unit 2: Talent Show

1. Talent Vocabulary:

		
Do acrobatics	Do cartwheels	Do tricks
		
juggle	Make sculptures	Paint portraits
		
Play instruments	Street dance	Read poetry
		
Tell jokes		

Unit 2: Talent Show

2. Irregular Comparative and Superlative Adjectives:

- **What are adjectives?** Adjectives are words that describe nouns. For example, in the sentence "The **big** dog barked loudly," the word "big" is an adjective that describes the dog.
- **What are comparative and superlative adjectives?** Comparative adjectives are used to compare two things. For example, "My dog is **bigger** than your dog." Superlative adjectives are used to compare three or more things. For example, "My dog is the **biggest** dog in the neighborhood."
- **Irregular adjectives** Most adjectives follow a regular pattern to form their comparative and superlative forms. However, some adjectives are irregular, meaning they don't follow the usual pattern. Two common irregular adjectives are "good" and "bad."

Good

- **Comparative:** better
- **Superlative:** best

Examples:

"This cake is **better** than the one I had yesterday." (comparing two cakes)

"This is the **best** cake I have ever tasted!" (comparing three or more cakes)

Bad

- **Comparative:** worse
- **Superlative:** worst

Examples:

"This weather is **worse** than yesterday's weather." (comparing two days)

"This is the **worst** movie I have ever seen!" (comparing three or more movies)

Unit 2: Talent Show

3. What physical abilities do we need for physical activities?

Have you ever wondered how athletes can run so fast, lift heavy weights, or balance on one foot? They have special physical abilities that help them do these things! Today, we're going to learn about four important physical abilities: speed, strength, balance, and stamina.

Speed is the ability to move quickly.

- We use speed in many activities, such as running, swimming, and cycling.

Strength is the ability to use our muscles to lift, push, or pull heavy objects.

- We use strength in activities like lifting weights, climbing, and playing sports that involve throwing or hitting.

Balance is the ability to keep our bodies steady and upright.

- We use balance in activities like walking on a balance beam, standing on one foot, and playing sports that require us to keep our balance, such as skateboarding or surfing.

Stamina is the ability to keep going for a long time without getting tired.

- We use stamina in activities like running long distances, playing long games, and dancing.
